**DETAILED ACTION**

***Claim Objections***

1. Claims 1-5 are objected to because of the following informalities:

In claim 1, lines 1 and 2, define "ARQ" and "IR". Claims 2-5 depend on claim 1.

Appropriate correction is required.

***Specification***

2. The disclosure is objected to because of the following informalities: update the application number on page 1 of the specification. Appropriate correction is required.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-5 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Patent eligible subject matter is determined whether the claim falls within one of the four statutory categories of invention received in 35 USC 101: process, machine, manufacture and composition of matter. The latter three categories define "things" or "products," while a "process" consists of a series of steps or acts to be performed. For purposes of 101, a "process" has been given a specialized, limited meaning by the courts.

Process claims must be tied to another statutory class (such as a particular apparatus) or transform underlying subject matter (such as an article or materials) to a different state or thing. If neither of these requirements is met by the claim, the method is not a patent eligible process under 35 USC 101 and is directed to non-statutory subject matter.

In this case, claims 1-5 recite a process or a method for transmitting comprising recited steps. However, the claim is not tied to another statutory class positively reciting the other statutory class to which it is tied, such as identifying the apparatus that accomplishes the method steps.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: from waiting for interrupt 108, determining the interrupt type step 110 is required in order to further perform the transmitting step 114, or NACK to 108, or ACK to 112. Omitting the step 11- amounts to a gap between the steps of 108 and 114 since the algorithm would be incomplete and unclear whether the next step after 108 should be step 112, 114 or back to 108.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
